Table of contents

Specific Outcome 1 :Plan the research of a computer topic.
• The plan identifies the topic, objectives, and scope of the research. • The plan identifies the time to be taken for the research, the research methods to be used, and the sources of information to be used.

• The plan identifies the target audience, presentation methods, and the computer applications to be used for the analysis of data and the presentation of the results of the research.
Specific Outcome 2 : Conduct research of a computer topic using computer technology
• The research conducted accumulates data according to the research plan. • The research conducted provides data analysis with conclusions. • The description of the analysis methods allows the validity of the analysis to be assessed. • Research progress is indicated at intervals by reports, according to the research plan. • The research conducted uses a computer application to analyse the research data.
Specific Outcome 3 : Present the results of research of a computer topic using computer technology
• The presentation is made using the computer application identified in the research plan. • The presentation communicates summarised research data and conclusions to the target audience.

NOTIONAL HOURS BREAKDOWN

The candidate undertaking this unit standard is best advised to at least spend one hundred hours of study time on this learning programme. Below is a table which demonstrates how these one hundred hours could be spread:
