NAME OF ASSESSOR	**SIKHUMBUZO DLAMINI**
ASSESSOR NUMBER	**RAS/07/2017/0101**

1. Assessment Preparation.

All assessment activities are conducted by the facilitator with authorization from the assessor. The assessment plan is provided to the facilitator by the assessor, who also conducts regular visits to the assessment centre to oversee the process. While some assessment tasks are carried out by the facilitator under the assessor's supervision, both formative and summative assessments are administered in the presence of the facilitator and, occasionally, the assessor. To date, learners have covered 56 credits of the total required 147 to complete the full qualification. This equals 38% of training, and assessments which has prompted the activation of interval moderation.

Learners undergo a thorough preparation for the assessment upon completion of each module or set of modules. This approach promotes transparency in the assessment process. Additionally, learners are required to verify the agenda and topics discussed during the assessment preparation phase.

The programme is conducted in a learnership intervention where 30% of the learning is theory and 70% practical.

Learners are being trained in theory and practical concurrently.

2. Assessment Design and Evaluation

	Fair	Valid	Reliable	Workable
Strategy	The assessment tools used for these particular assessments, processes, were tools that were developed by me the Assessor in consultation with the moderator. Tools where in consideration of the training environment and level of understanding from the learners enrolled. It also ensured that all SO and AC of the unit standard are covered on the assessment tool.,	All the assessments were created and conducted, according to unit standards details and their specific outcome and assessment criteria's	The briefing/training and the regular assessment, conducted during the course of the training gave the learners an understanding of what is required for the assessment.	Time and assessment venue allocated for each assessment process was sufficient
Plan	Unit standards were divided into separate modules. All the learners were given opportunity to	The working plan included workplace assignments and it made the work valid the learners	All assessments were created and aligned with the specific unit standards	Time allocated for each learning area was sufficient

	understand concepts through facilitation and barriers to their learning were considered. Those who were found not competent in certain activities were given a chance to re write the specific outcomes	practical work experience		
Methods	Learners did research, discussions, formative assessments, summative assessments and practical workplace assignments	Learners were able to complete These assessments and those who were NYC, were given another chance. for assessment	The methods used were where Written ,observation and oral, which gave me the assessor enough information of measuring competency of each learner	The assignments were handwritten and others typed. No one had constraints in trying to produce evidence

3. Assessment Process

A well-structured assessment process is essential in education and training because it ensures that learning outcomes are measured accurately, fairly, and consistently. It provides credible evidence of a learner's knowledge, skills, and competence, confirming whether they meet the required standards.

An effective assessment process also:

- Maintains quality and credibility of programmes and qualifications
- Guides learning and improvement by identifying strengths and areas needing support
- Ensures fairness and transparency through standardised and objective evaluation methods
- Supports accountability for training providers, facilitators, and learners
- Informs decision-making related to certification, progression, and workplace readiness

Assessment methodologies applied are in the form of the following methods:

- Written questionnaire
- Observation
- Project Based

3.1 Pre-assessment Meeting

A meeting was held between the facilitator and the learner to discuss the process of the assessment, the method was covered in the induction, pre meeting are held when I visit the training centre. Candidates know what to expect on the assessments conducted. The meeting is attended by the

assessor and facilitator and the learners which were to determine the readiness of all stakeholders to undergo an assessment process.

3.2 Assessment

All assessment conducted thus far using an acceptable assessment method, these included knowledge written assessments, research and group work. These methods ensured that adequate competency skilled is measured for each learner that participated in the assessment process. As the assessor, I made sure that the evidence that was submitted by learners was measured against the criteria of each specific outcome per unit standard assessed.

3.3 Evaluation

The method used to determine competency or non-competency were observation and formal marking. These methods were guided by the unit standard details.

3.4 Feedback

Each assessment process had its own feedback session. Candidates are emailed individual feedback and if there's need to further discussion between the assessor and candidates.

3.5 Reviewing

The Assessor and the candidate review the entire assessment process, to determine that all stakeholders in the process are treated fairly, without discrimination and the process was fair. Learners had to give a written review of each assessment to ensure that they voice out any unfairness on the entire process.

3.6 Re Assessment

Remedial action was administered whenever a learner demonstrated insufficient competence in specific assessment criteria, outcomes, or unit standards under evaluation. After remediation, the assessment process recommenced, and learners who addressed their deficiencies were subsequently deemed competent. This approach was adopted to ensure comprehensive competence across all elements of the learning programme.

3.7 Competency

Following the assessment process, the assessor made a judgement of the learners' competence based on the on the assessment criteria, specific outcome, or unit standard, depending on relevance.

4. Assessment Details

4.1 Unit Standards Covered

Unit Standards	Credits	Segmentation	Status
114076	3	Fundamental	Completed
114183	7	Fundamental	Completed
114051	4	Fundamental	Completed
114055	3	Fundamental	Completed
114059	5	Fundamental	Completed
114050	4	Fundamental	Completed
8252	6	Fundamental	Completed
114046	4	Core	Completed
114052	8	Core	Completed
114058	7	Core	Completed
10135	8	Fundamentals	Completed
114074	5	Core	Completed
114061	5	Core	Completed
114056	3	Core	Completed
114054	7	Core	Completed
114060	5	Core	Completed
114075	5	Core	Completed
114072	9	Core	Completed
114043	10	Elective	Completed
114047	9	Core	Completed
114053	6	Core	Completed
114066	4	Core	Completed

4.2 Academic Progress

Unit Standard Details			
	Total Credits	**Credits Covered**	**Credits to be covered**
Fundamentals	40	40	0
Core	77	77	0
Electives	30	10	20

4.3 Learners Details

No	Learner Surname	Learner Name	Learner ID
1	Nzuza	Anele Nosipho	0110311171083
2	Kubeka	Bafana Sidwel	9011155300088
3	Mahlangu	Gugu	0101080611086
4	Mehlape	Itumeleng Rose	0205230642089
5	Nkosi	Ndumiso Briliant	0311056259089
6	Mtshali	Nkosinathi	9901046369088
7	Songo	Nomgqibelo Bella	9110190154086
8	Ngwenya	Thandeka	9808150151089

11	Kwaza	Asisipo	9907140379089
12	Mogashoa	Hlarara P.	9802175338086
13	Boikanyo	Kamogelo	0306120347084
14	Moleke	Keabetswe Teboho	9511085701081

4.4 Learner Demographics

Male	Females	Disabled	Total Learners
07	07	00	14

4.5 Learner Achievement

The assessment progress outlined below is of the assessments received and marked as of when the report was done. Learners are still submitting their assessments after completion.

Unit Standards	Learners Assessed	Learner Submitted	Learners Competent	Learners not Competent
114074	14	14	14	00
114061	14	14	14	00
114056	14	14	14	00
114054	14	14	14	00
114060	14	14	14	00
114075	14	14	14	00
114072	14	14	14	00
114043	12	14	14	00
114047	12	10	09	01
114053	12	10	09	01
114066	12	10	10	00

5 General Comment

The training has proceeded in alignment with the established plan, and candidates have effectively demonstrated their competence in managing the learnership process. The quality of evidence submitted by learners, under the facilitator's guidance, is commendable. The programme is currently in its final stages, and pre-moderation has been completed by the internal moderator.
