Summary

The Honor End User Computing programme continued to make steady progress during July 2026. The focus remained on Module 7: Microsoft Office Excel, where learners developed practical spreadsheet skills that can support both their studies and workplace requirements.

INTERACTIVE DELIVERY

Training was delivered face-to-face at the Eruditio Training premises using an interactive approach. Learners participated in practical activities and shared devices where necessary to ensure that everyone remained involved.

PROGRESS AND SUPPORT

Follow-up support was provided where needed. Learner work was submitted for assessment, and the group remains positive, enthusiastic, and focused as they continue working towards the required programme outcomes.

Training Objectives

THE OBJECTIVES OF THE JULY TRAINING SESSIONS WERE TO:

01 Develop learners' knowledge and practical skills in using Microsoft Office Excel to create, format, edit, and manage spreadsheets.

02 Enable learners to apply the concepts, functions, formulas, and procedures covered in Module 7 of the End User Computing programme.

03 Provide structured practical activities that allow all 16 learners to participate effectively.

04 Monitor learners' participation, attendance, practical competence, and progress while maximizing individual hands-on practice.

Delivery focus: practical spreadsheet skills, effective participation, individual hands-on practice, and ongoing monitoring of attendance and competence.

Check / follow-up required	To follow up on all learners

Assessment status: Learner work was submitted and is moving through the assessment process. Outcomes, outstanding requirements, and individual progress require continued follow-up.

Challenges Identified

07 · ATTENDANCE

The overall attendance shows inconsistent attendance, late arrival, and limited communication from some learners remain concerns.

01 **Monitor attendance closely** throughout the remaining programme period.

02 **Monitor punctuality** and follow up where late arrival affects learner participation.

03 **Reinforce communication** so all learners promptly notify the facilitator when they will be absent.

04 **Report late arrival promptly** and maintain learner responsibility for attendance.

Attendance and punctuality should be monitored closely, and all learners should be reminded to inform the facilitator promptly if they will be absent or late.

Conclusion

Overall, the End User Computing programme made satisfactory progress during July 2026. Four scheduled sessions gave the 16 learners practical exposure to Microsoft Office Excel and helped strengthen the spreadsheet skills required for Module 7. Training was delivered face-to-face, with interactive activities and paired work.

ATTENDANCE AND PARTICIPATION

Most learners attended three of the four sessions and showed steady participation throughout the month. The overall attendance rate still requires continued monitoring, together with punctuality and timely communication when learners are unable to attend.

ASSESSMENT AND FOLLOW-UP

Learners submitted work and are currently moving through the assessment process. Assessment outcomes, outstanding requirements, and individual learner progress should continue to be followed up consistently.

Ongoing facilitator support, together with improved attendance and communication, will help learners address any remaining gaps and continue progressing towards successful achievement of the programme outcomes.
