Summary

The System Support programme has continued to make steady progress, with learners achieving meaningful outcomes throughout the training period. Learners have developed valuable technical knowledge and practical skills, while classroom participation, teamwork, and overall engagement have remained positive.

COMMITMENT AND ASSESSMENT

Most learners have shown good commitment by attending sessions and completing the required work. Submitted activities are currently being assessed, with feedback and any outstanding requirements receiving continued attention. Where attendance, punctuality, or communication concerns have arisen, these have been addressed through ongoing follow-up.

FINAL-STAGE PROGRESS

Learner morale has remained positive, with growing enthusiasm as the group moves closer to completing the programme. This reflects the learners' perseverance, development, and commitment to reaching the final stage successfully.

Facilitator guidance will continue throughout the remaining phase of the programme. Progress will be monitored closely, with further updates provided as learners complete their final requirements.

Training Objectives

THE OBJECTIVES OF THE JULY TRAINING SESSIONS WERE TO:

01 Develop learners' knowledge and practical skills in configuring, operating, and administering server computers and peripherals.

02 Enable learners to apply the concepts and procedures covered in Module 5 of the System Support programme.

03 Monitor learners' participation, attendance, submissions, and progress toward programme completion.

04 Prepare all 14 learners for the final module and support the completion of practical activities and logbooks.

Conclusion

The July 2026 System Support training programme progressed satisfactorily, with Module 5 completed as planned and only one module remaining. Learners continued to build relevant knowledge and practical skills in server systems and peripherals, while most attended regularly and participated positively in the training sessions.

TEAMWORK AND ASSESSMENT

The group generally demonstrated good teamwork, respect, and commitment to learning. All 14 learners submitted work, which is currently undergoing assessment. Attendance and punctuality concerns were limited to a small number of learners.

ATTENDANCE FOLLOW-UP

In some cases, absences were linked to illness and were communicated to the facilitator, while other absences and late arrivals took place without timely notice. These cases should continue to be monitored.

Outstanding submissions and assessment follow-ups should remain a priority, while learners are encouraged to maintain regular attendance and communicate any challenges as early as possible.
