CONFIDENTIAL CLIENT REPORT

1. SUMMARY

The System Support programme continued to demonstrate positive progress as learners advanced through the final stages of Module 6. Learners strengthened their knowledge and practical skills in server administration, computer peripherals, and Database Access. The majority of learners remained actively engaged and showed commitment to completing programme requirements. A significant achievement is that learner portfolios and assessments have been submitted and are progressing through the assessment process. Several learners displayed resilience by balancing training commitments with personal, health, family, and employment-related responsibilities.

Strong teamwork, peer support, respectful conduct, and participation contributed to a productive and collaborative learning environment. Learners who maintained excellent attendance consistently demonstrated dedication and a positive attitude towards learning. The group has shown measurable growth in both technical competence and professional development throughout the programme. Attendance and punctuality remained areas requiring closer attention, as some learners experienced challenges in maintaining consistent participation. In certain instances, missed sessions and limited communication affected continuity of learning and progress tracking. Despite these challenges, learners continued to demonstrate determination and a willingness to overcome obstacles.

The overall progress achieved reflects the learners' commitment to developing skills that will support future employment opportunities. Continued focus on completing outstanding activities, logbooks, and assessment requirements will ensure learners are fully prepared for programme completion. The cohort has reached an important milestone and can be proud of the growth, knowledge, and experience gained during this journey, despite 1 learner being dismissed.

With October graduation approaching, there is a strong sense of excitement, accomplishment, and anticipation as learners prepare to celebrate the successful completion of their qualification and the beginning of new opportunities.

2. TRAINING OBJECTIVES

The objectives of the September training sessions were to:

- Cover two-unit standards in Module 6, focusing on Database Access.
- Introduce Microsoft SQL Server and explain its role in creating, managing, and accessing databases.
- Develop learners' practical database skills through hands-on SQL Server activities.
- Provide additional guidance and support to learners.
- Maintain learner participation and enjoyment through practical, interactive learning.

8. CONCLUSION

Overall, the System Support programme made satisfactory progress during September. One programme day was allocated to an Honor learner address and did not include facilitated training. Learners progressed through Module 6, focusing on Database Access and practical Microsoft SQL Server activities.

All 13 portfolios were recorded as submitted and in the assessment process at the time of reporting. Following one dismissal, the active cohort stands at 13 learners as they complete outstanding requirements and prepare for October graduation.
